ABSTRACT

The purpose of this text is to assist supervisors, and practicum students and interns in their practicum/internship training. The text contains theoretical components that are valuable and essential to the training of student counselors and psychotherapists. In addition to the theoretical aspects presented, training activities germane and necessary to the development of applied counseling skills are explicated. Specifically, this text responds to major changes that have taken place in the professional, legal, and ethical aspects of training. The text includes: (1) instructional guidelines; (2) mechanics for initiating and maintaining a practicum or internship; (3) student counselor/client monitoring techniques; (4) guidelines for supervision; (5) evaluation techniques; and (6) ethical/legal issues related to selected problem areas in the practice of counseling psychology.
